

## RIBA Approved Flooring & Tiling CPD Seminars

RIBA Core Curriculum: Design, Construction and Technology Modules

ARDEX is committed to providing RIBA approved Flooring and Tiling CPD Seminars that allow attendees to improve and broaden their skill base.

Our seminars can be delivered at your practice or by an online webinar at a time of your convenience.

#### Available CPDs:

1. Natural Stone Floor & Wall Tiling
2. Screeding, Levelling & Subfloor Preparation
3. Wall & Floor Tiling
4. Wet Room Tiling
5. Tiling in Swimming Pools and Leisure Centres
6. Underfloor Heating

#### Natural Stone Floor & Wall Tiling

- Make informed choices when specifying natural stone wall and floor tiling by considering the impact that tiles, backgrounds and finished environments will have on the adhesive and grout specification.
- Learn how to avoid common natural stone installation failures through optimum product specification and guidance on best practice.
- Feel confident about selecting and specifying the most appropriate tile fixing solutions for natural stone.

ARDEX was proud to help specify a tiling solution that included luxury marbles and stone finishes as part of the iconic Savoy Hotel

**£220m  
restoration  
project.**

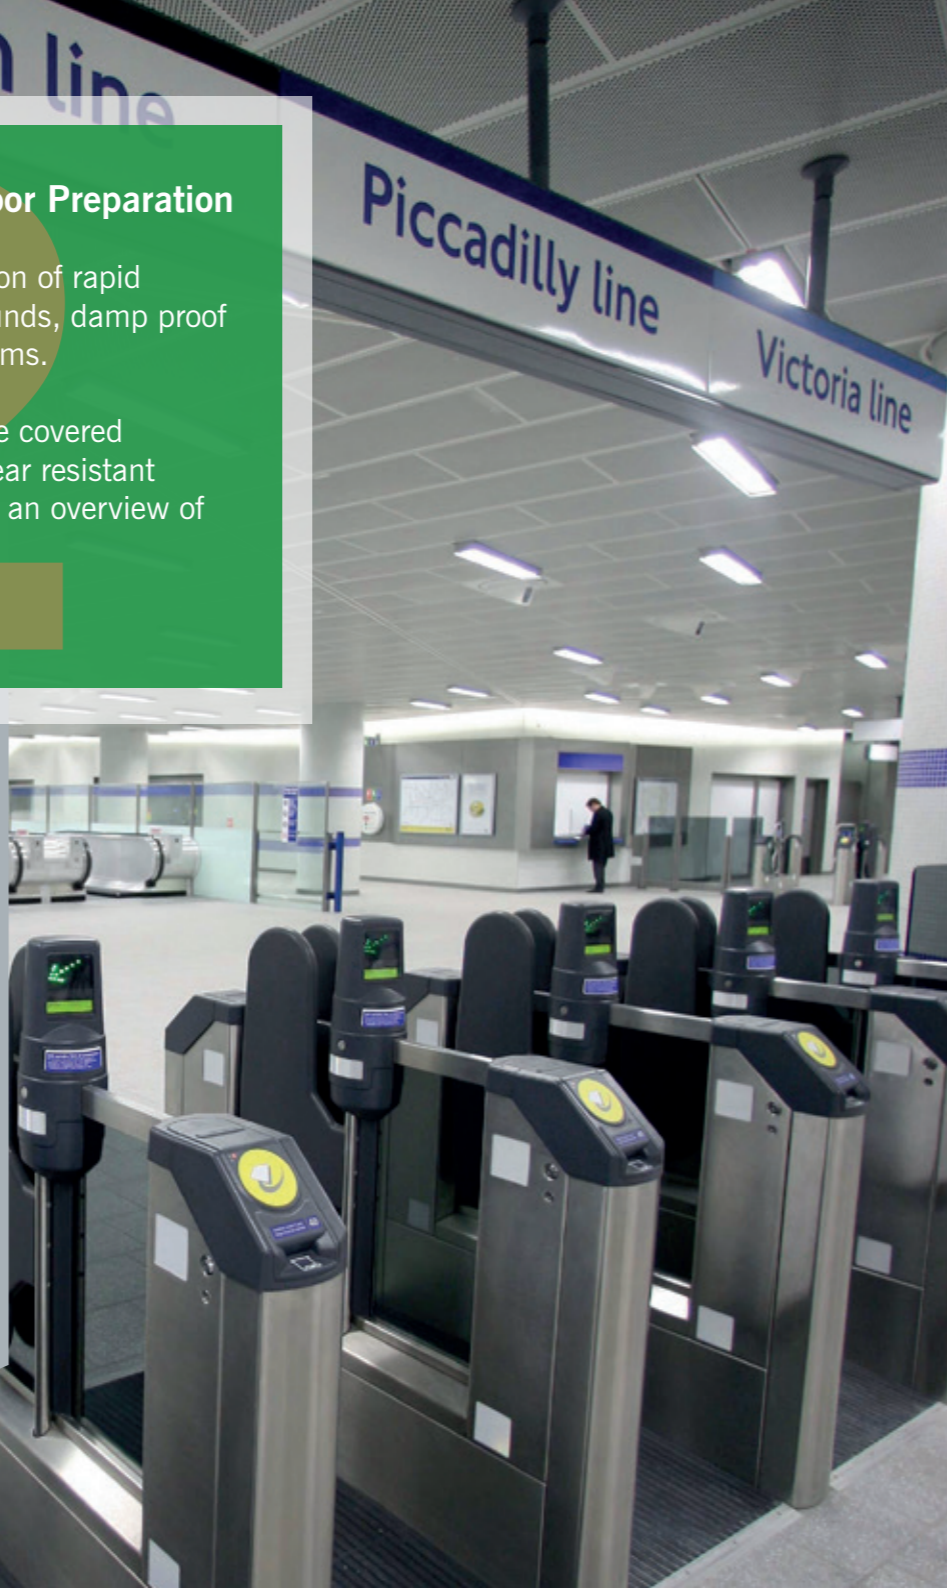

## 2 Screeding, Levelling & Subfloor Preparation

- Understand the correct installation of rapid drying screeds, smoothing compounds, damp proof membranes and rapid drying systems.
- A wide range of situations will be covered including pumped applications, wear resistant screeds, rapid subfloor repairs and an overview of fast track flooring construction.

ARDEX Rapid Drying Screeds allow floor coverings to be applied in just

# 4 hours

compared to standard sand and cement screeds which can take months to dry, proving a crucial factor in the success of numerous, time sensitive, London underground construction projects.

# 600m<sup>2</sup>

of worn and damaged flooring was refurbished with a new flooring system finished with Hopton Wood Limestone tiles. The project went on to become a Tile Association Award Winner in 2019.

## 3 Specify Wall & Floor Tiling

- Make informed choices when specifying wall and floor tiling by considering the impact that tiles, backgrounds and finished environments will have on the adhesive and grout specification.
- Learn how to avoid common installation failures through optimum product specification and guidance on best practice.
- Feel confident about selecting and specifying the most appropriate tile fixing solutions in common situations.

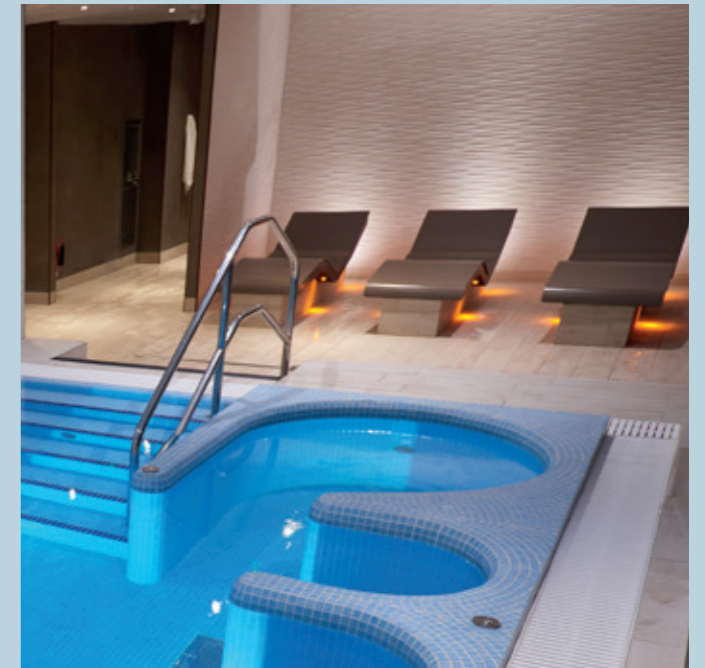

## Specify Wet Room Tiling

- Make informed choices when specifying tiling in wet rooms by gaining an understanding of the general design considerations, and the importance of waterproofing.
- Advice is also given on specifying tiles for safety and slip resistance, the incorporation of under tile heating systems, fixing techniques and tile adhesive and grout selection.

The David Lloyd Leisure Club in Colchester incorporated a full system of ARDEX products with

**3500m<sup>2</sup>**

of tiling to cover pool areas, changing rooms, and walkways.

## Specify Tiling in Swimming Pools and Leisure Centres

- Make informed choices when specifying tiling in swimming pools and leisure areas by considering the impact that tiles, backgrounds, water chemistry and the finished environment will have on the adhesive and grout specification.
- Learn how to avoid common failures through optimum product specification and guidance on best practice.
- Feel confident about selecting and specifying the most appropriate tile fixing solutions for use in swimming pools and leisure centres.

In one of ARDEX UK's largest tiling projects

**866,000**

tiles were fixed in the London Aquatics Centre, which formed the gateway to the Olympic Park.

## Underfloor Heating

- Make informed choices when specifying underfloor heating, selecting screeds and carrying out subfloor preparation by understanding the different underfloor heating systems and their features and best usage.
- Learn how to avoid potential issues associated with underfloor heating and general considerations for specifying underfloor heating with guidance on best practice.
- Key watch points when specifying underfloor heating with resilient floorcoverings, tile and natural stone.

ARDEX flooring systems were used extensively for the underfloor heating areas of the pool surrounds and changing rooms of the

# £40m

rebuild of Butlins Bognor Regis Pool Complex.
